

FLO

OPENFOOTLAB
CUSTOM FOOT-CARE SYSTEMS

● FITTING • CAPTURE • FABRICATION

Built around the individual.

A local, human-guided pathway for custom foot fitting, precision capture and small-batch 3D-printed inserts.

BUILD YOUR FOOT PROFILE

15-day starter • By appointment

From first capture to a better fit.

We absorb the technical complexity. The client gets a clear, guided experience built around the shape, pressure and day-to-day reality of their feet.

01

START THE PROFILE

A 15-day starter period helps establish a useful baseline before ongoing service is considered.

02

CAPTURE THE FIT

Guided photos, the FLO-Mat and fitting observations document each side independently.

03

DESIGN + FABRICATE

Geometry, materials and targeted support are translated into a custom small-batch insert.

04

FIT + FOLLOW UP

Delivery is followed by fit confirmation, practical feedback and documented refinement when needed.

THE FLO PRINCIPLE

Bilateral by design. Asymmetric by need.

Left and right feet are measured, designed and reviewed as individual systems - because real feet are rarely identical.

Engineered with purpose.

A disciplined workflow joins digital capture, additive manufacturing and hands-on finishing.

MATERIALS + FINISHING

INDIVIDUAL GEOMETRY

Support and relief can be tuned by region instead of relying on one uniform foam shape.

RESPONSIVE MATERIALS

3D-printed lattice structures pair with breathable fabric and cushioning layers.

DOCUMENTED ITERATIONS

Each build can carry a clear version, fit status and adjustment history.

LOCAL, SMALL-BATCH BUILD

Close coordination supports practical turnaround and direct quality review.

TECHNOLOGY STAYS BEHIND THE SCENES.

The person remains the destination.

FLO

BY OPENFOOTLAB

Maximize healthy days.

A calm, local fitting and fabrication experience for people whose feet deserve closer attention - with room for the care team to stay involved.

FOR CLIENTS

- **GUIDED**

No complicated app or technical setup is required for the fitting experience.

- **PERSONAL**

Each side is observed and built around the individual.

FOR CARE TEAMS

- **LOCAL SUPPORT**

Appointment-based fitting, fabrication and follow-up across the local service area.

- **HUMAN IN THE LOOP**

FLO supports - and does not replace - licensed clinical judgment.
